DEDICATED COVID-19 TEST KIT MANUFACTURING FACILITY

Our facility has been designed, developed and successfully proven for the manufacture of real time qPCR kits and reagents for the detection of viral pathogens, especially SARS-CoV-2. We can support at any level, from dispensing and aliquotting to large volume reagent manufacturing. All qPCR kit and reagent manufacturing is carried out under strict ISO 9001 and ISO 13485 accreditations.

COMPLETE SUPPORT SOLUTIONS

Our facility features over 10,000 sqft of socially-distanced manufacturing areas, quality control stations, packing, logistics, and expediting capabilities.

Automation systems enable consistent, reliable high-throughput production. Our 5-stage quality control process ensures all product meets or exceeds our exceptional quality standards.

More space and further scale-up capacity is available if necessary.
